Requirements  
heavily changed

New questions  
invented

90% questions  
didn't fit the  
domain of use case

# Conflicts in merging the interviews

- Divergent answers by group members to the same questions
- Some of the answers weren't elaborative enough
- The answers needed further clarification
- Requirement changed without prior notification

# Solving the conflicts

Review

Collect all interviews and review them

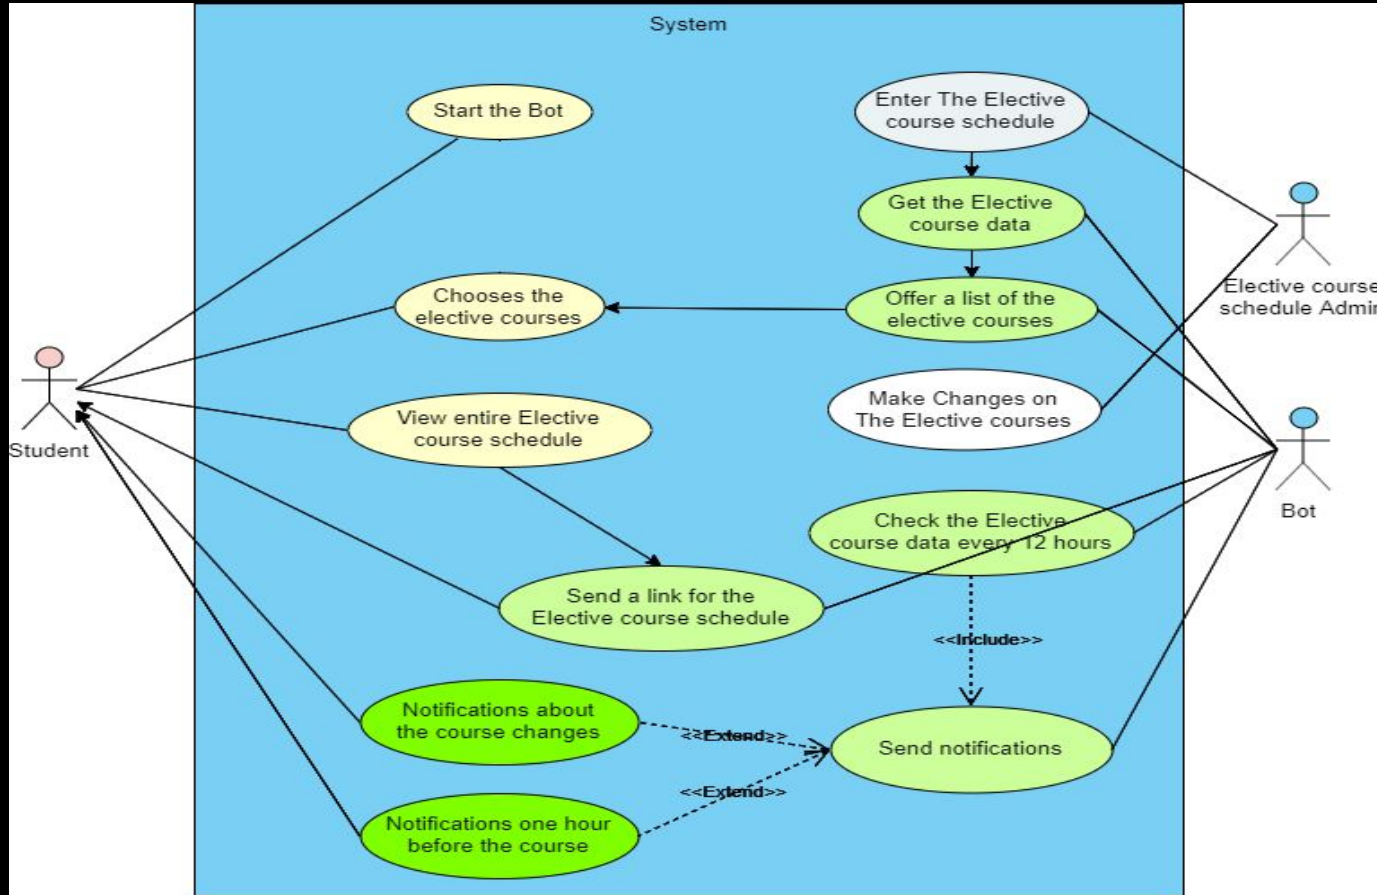

Identify

Analyze the interview and identify conflicts

Discussion

Invite stakeholders for discussion

# Use Cases Diagram

# Relevance of the Interviewer's questions

The question the interviewers asked concerning our project were crucial in identifying our needs towards the system to-be, they tried to ensure they have sufficient answers in their quest to developing the system.

# Lessons learnt

- Client requirements are subject to change.
- Varying and inconsistent requirements from the stakeholders.
- Interviews are a good way of eliciting requirements from customers
- It helps both customers and stakeholders in discovering further requirements of the system
